Dear Russ,

It has now been six months since Haldane Central School District has participated in the "Certified Installer Program" for the NeverStrip product with Advanced Surface Technologies. The program has far exceeded my expectations.

I originally sold this program to the school board as a long term money saving maintenance program. I believe I am saving money already. I save energy and manpower by not burnishing or stripping ever again. It is also more environmentally friendly because I no longer use those chemicals to do those jobs.

Initially I was a little skeptical about the durability of the product. We have already had at least three winter storms with snow and ice. Our maintenance staff has used ice melt products at least five times now also. Our floors still look as if they were done yesterday. This long lasting shine has made a wonderful impression with the community and staff.

Another benefit that came along with this product is the positive response and attitude of my cleaning staff. When we are scheduling a new area to apply NeverStrip to, everyone volunteers. They also want the product in their area because they see how much easier it is to maintain. This product generates pride.

NeverStrip is a truly amazing product. After seeing the lasting results of this product as well as the ease of which it is used, I will continue to use this product and expand the areas I use it on. I would highly recommend NeverStrip to any institution. If any company would like to visit our district they are more than welcome. I can be contacted at 845-265-9254 or by e-mail at mtwardy@haldaneschool.org.

Thank you,

Michael C. Twardy
Director of Facilities and Operations
Haldane Central School District
