

# NeverStrip

FLOOR COATINGS™

## Testimonial Interview with Barry Gore, J and G Flooring

**NeverStrip Micron Coatings (NeverStrip Tile Seal™ and NeverStrip Liquid Grip™) Applied on Italian Porcelain in a Tennessee Bank by J and G Flooring, near Knoxville TN. [JandGFlooring@twlakes.net](mailto:JandGFlooring@twlakes.net)**

**Barry Gore** and his big sister, Teresa Huffines sat down with me to describe J and G Flooring's recent project with NeverStrip Micron Products-NeverStrip Tile Seal™ and NeverStrip Liquid Grip™, respectively.

Textured Porcelain Before NeverStrip Tile Seal

### Textured Porcelain Floor After with NeverStrip Tile Seal

### The Project

J and G Flooring installed a high-priced, polished, Italian porcelain floor in a Tennessee bank. The flooring was specified by the architectural and design firm. There were two separate surface installed: a super smooth, highly polished floor and more textured porcelain.

Soon after installation, the Bank began to experience slip and fall incidences, especially on the highly polished, smooth porcelain. The Bank reached out to J and G Flooring for a solution. At one point, they asked J and G **to remove the entire floor and replace it with something else!** Barry Gore said, “this was going to be a terribly difficult removal. We reached out to NeverStrip to see if there was an alternative.”

J and G recently completed the application of NeverStrip Tile Seal and NeverStrip Liquid Grip with NeverStrip Color Sealer in the grout lines.

Polished Porcelain Before Liquid Grip

Polished Porcelain After Liquid Grip

Barry and Teresa said the following:

“The customer is pleased. The floor was not replaced.”

“The NeverStrip solution provided a low-cost approach to address a serious challenge and saved the customer a whole lot of money.”

“NeverStrip’s products and technical support have been terrific. Brian Warning was wonderful with his technical support in the field and he is a really nice guy to boot.”

NeverStrip Tile Seal was applied on the more textured porcelain and is looking great, while doing a great job addressing the need for more traction.

NeverStrip Liquid Grip was applied on the smoother porcelain and certainly altered and darkened the floor’s appearance but is providing the needed and desired traction. The Bank’s #1 priority.

The NeverStrip Color Sealer™ in Dove White was applied to the grout lines and make them look like new. The Color Seal was completed prior to the Tile Seal and Liquid Grip applications.

## **Conclusion**

Barry and Teresa cannot say enough about the NeverStrip Micron products and the NeverStrip support. J and G Flooring delivered an important, creative and financially attractive solution to its important customer.

Teresa said, now we are working with the Bank maintenance staff to educate them how to properly maintain Tile Seal and Liquid Grip.
