

CASE STUDY

MARBLE RESTORATION VS. REPLACEMENT

How **T.V.S. Floor Coatings and Restoration of Idaho** saved a homeowner over \$50,000.

Shelby Tucket and Jim Lasson of T.V.S. Floor Coatings and Restoration of Idaho were given a challenge. A homeowner was going to replace all the marble flooring in her house. Over 3,500 square feet. The homeowner assumed that she needed to replace the marble, at a cost approaching \$100,000. The floors had extensive staining and the non-sanded grout was in terrible shape.

Shelby and Jim knew how well NeverStrip™ products restore hard surface flooring and perform over long periods of time and they were confident T.V.S. could restore the marble to a like-new condition at a fraction of the cost and time of replacement.

CASE STUDY

MARBLE RESTORATION VS. REPLACEMENT

T.V.S. created a plan that would take 1 week to finish. It took 6 days. This was a big improvement over the homeowner's multi-month estimate to replace the marble.

Here is the core process T.V.S. used:

- **NeverStrip Deep Clean™** - Deep Clean is a high alkaline cleaner. It is specifically formulated to deep clean hard surface floors including marble, ceramic and porcelain. T.V.S. used Deep Clean with a oscillating Square Scrub machine and a Green Turf Pad.
- **NeverStrip Color Sealer™** - is a premium grade, urethane-based, opaque grout color sealer to make old grout look new and keep it that way. It is oil repellent, stain resistant, breathable, flexible, waterproof, color stable. Color Sealer was used in the showers.
- **NeverStrip Stone, Terrazzo and Concrete Seal™** - Stone, Terrazzo and Concrete Seal ("STC") was applied to all the marble and grout. STC is a clear, silica based, high performance, micron-thin film treatment for all natural stones, terrazzo and concrete. 3 applications were used in the showers (floors, walls, and ceilings), and 2 in the home. STC was applied at 1500 sq. feet per quart per coat. The homeowner appreciated no odor and the 5 minute dry times!

The restoration was a huge success. The homeowner was so happy with the work, that she hired T.V.S. to refinish her granite countertops, with NeverStrip products.

NeverStrip Floor Coatings is a manufacturer of exceptional, high performance floor coatings. For more information go to: www.NeverStrip.com; call **800-854-5414** or e-mail Info@NeverStrip.com.

T.V.S. Floor Coatings and Restoration is a hard surface flooring contractor based out of St. Anthony, Idaho. It serves Idaho, Wyoming and Montana.
